

Teo Spiller

S.P.A.M. sonnets

Version 1.0 e

NEW MEDIA TEXTUALITY

Teo Spiller, 2010

DOBER, Contemporary Art Institute

Kindly supported by Ministry of Culture of Republic of
Slovenia

METHOD

Between years 2002 and 2004 Teo Spiller entered into database few thousand subjects and senders names of SPAM (junk) mail. Web application chooses 15 of them, based on the time and users data (IP, browser, OS, etc.) and compose them in the form of italian sonnet. Results are written into a database and this book is a random selection of them

In the subject of a SPAM mail , there was often receivers name. If user enters his name, it appears in the sonnet as receivers name.

In this book, all names were changed to protect users privacy.

S.P._/_.M sonnets
